ASX/Media Announcement

Proposed Name Change – “Globe Metals & Mining Limited”

The Board of Directors of Globe Uranium has resolved to propose to its shareholders that the name of the Company be changed to “Globe Metals & Mining Limited”.

The new name is designed to reflect the increased activities and interests of the Company, in particular the multi-commodity Kanyika Project in central Malawi, which contains niobium, uranium, tantalum and zircon.

Globe Uranium’s Managing Director, Mr. Mark Sumich, said “this is a sensible change, as it reflects the broader interests of the Company that have arisen from our initial exploration success in Malawi.”

“In addition to our multi-commodity Kanyika Project, the Company also has a number of pure uranium projects, in particular the Livingstonia Uranium Project where the Company is undertaking a 7,000m drilling program. The proposed change of name is designed to accommodate all of the commodities in which we have an interest.”

A Notice of Extraordinary General Meeting will be issued shortly to convene the meeting of shareholders.
